## 100% German-made reliability

All Leibinger printers are made in our manufacturing facility in Tuttlingen, in the South of Germany. With the exception of a few components, each part is made from raw materials under a single roof, and we can ensure that every unit is thoroughly checked to ensure it is worthy of the Leibinger name.

**Made in Tuttlingen, trusted around the world.**

Info & Contact

## Quality is in the details

Leibinger has been pursuing a production strategy geared towards the highest quality for decades. This means that all quality-relevant work steps have always been performed in-house. And at Leibinger, this begins with manufacturing the smallest parts such as special screws for the print head.

## Innovation is in our bones

Leibinger constantly invests in the most modern production technologies to manufacture its products. Maximum precision and production automation are deeply rooted in Leibinger's DNA
