CONFIRMATION

about food packaging safety

Product: Ink (black)
Part-Numbers: 70000-00801

The above mentioned product is an industry standard chemistry for the coding and marking of the external surface of food and other packaging, where a functional barrier between the ink and the food prevents the ink from contacting the food either directly or indirectly.

The product is used for small area marking and coding of packaging materials with codes such as best-before dates and LOT numbers.

The product is safe within its intended use and manufactured to be compliant with the following guidelines and regulations:

- EU Framework Regulation 1935/2004 on materials and articles intended to come into contact with food.
- EU GMP Regulation 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food.
- Swiss Ordinance 817.023.21 (Annex 6, latest amendment)
- Manufactured within quality management system (ISO 9001 or equivalent)
- EuPIA Guideline on Printing Inks Applied to the Non-Food Contact Surface of Food Packaging Materials and Articles, July 2012
- EuPIA Good manufacturing practice-Printing inks for food contact materials, March 2016
- EuPIA Exclusion policy for printing inks and related products, March 2016.
