Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

| First-aid measures after inhalation | : Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/doctor if you feel unwell. |
|---|---|
| First-aid measures after skin contact | : Rinse skin with water/shower. Take off immediately all contaminated clothing. Repeated exposure may cause skin dryness or cracking. |
| First-aid measures after eye contact | : Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor. |
| First-aid measures after ingestion | : Rinse mouth. Do NOT induce vomiting. Obtain emergency medical attention. |
| 4.2. Most important symptoms and effects, | both acute and delayed |
| Symptoms/effects Symptoms/effects after inhalation Symptoms/effects after eye contact | Suspected of damaging fertility or the unborn child. May cause respiratory irritation. Causes serious eye damage. |

4.3. Indication of any immediate medical attention and special treatment needed

When in doubt or if symptoms are observed, get medical advice.

| SECTION 5: Firefighting measures | |
|---|--|
| 5.1. Extinguishing media | |
| Suitable extinguishing media Unsuitable extinguishing media | Dry chemical, CO2, or water spray or regular foam. Making extinguishing agents environment-friendly. Do not use a heavy water stream. |
| 5.2. Special hazards arising from the subst | tance or mixture |
| Fire hazard Explosion hazard Reactivity in case of fire Hazardous decomposition products in case of fire | Highly flammable liquid and vapour. The vapours are denser than air and may travel along the ground. Distance ignition possible. May form flammable/explosive vapour-air mixture. Combustion produces irritating gases. Carbon dioxide. Carbon monoxide. Nitrogen oxides (NOx). |
| 5.3. Advice for firefighters | |
| Firefighting instructions Protection during firefighting | Use water spray or fog for cooling exposed containers. Exercise caution when fighting any chemical fire. Prevent fire fighting water from entering the environment. Do not enter fire area without proper protective equipment, including respiratory protection. |

| SECTION 6: Accidental release | measures |
|--|--|
| 6.1. Personal precautions, protect | ive equipment and emergency procedures |
| General measures | : Remove ignition sources. Use special care to avoid static electric charges. No open flames. No smoking. |
| For non-emergency personnel | |
| Emergency procedures | : Evacuate unnecessary personnel. |
| For emergency responders | |
| Protective equipment Emergency procedures | Use self-contained breathing apparatus and chemically protective clothing.Ventilate area. |
| 6.2. Environmental precautions | |

Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters.

| 6.3. Methods and material for containment and cleaning up | | |
|---|--|--|
| For containment | : Soak up spills with inert solids, such as clay or diatomaceous earth as soon as possible. Collect spillage. Store aways from other materials. | |
| 6.4. Reference to other sections | | |

See Section 8. Exposure controls and personal protection. Concerning disposal elimination after cleaning, see section 13.

| SECTION 7: Handling and storage | |
|--|--|
| 7.1. Precautions for safe handling | |
| Additional hazards when processed Precautions for safe handling | Handle empty containers with care because residual vapours are flammable. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent formation of vapour. No open flames. No smoking. Use only non-sparking tools. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Avoid formation of vapours. |
| 7.2. Conditions for safe storage, includi | ing any incompatibilities |
| Technical measures | : Proper grounding procedures to avoid static electricity should be followed. Ground/bond container and receiving equipment. Use explosion-proof electrical, ventilating, lighting equipment. |
| Storage conditions | : Keep only in the original container in a cool, well-ventilated place. Keep in fireproof place. Keep container tightly closed. |
| La constructive de la constructive | : Strong acids. Strong bases. Oxidizing agent. |
| Incompatible products | . Other acids. Other bases. Oxidizing agent. |

8.2. Exposure controls

Personal protection equipment

Personal protective equipment:

Avoid all unnecessary exposure. Gloves. Protective clothing. Safety glasses. **Personal protective equipment symbol(s):**

Eye and face protection

Eye protection:

Wear eye glasses with side protection according to EN 166.

| Eye protection | | | |
|----------------|----------------------|-------------------|----------|
| Туре | Field of application | Characteristics | Standard |
| Safety glasses | Droplet | With side shields | EN 166 |

Skin protection

Skin and body protection:

Wear suitable protective clothing

| Skin and body protection | |
|--------------------------|-----------|
| Туре | Standard |
| Overall, Lab coat | EN 1149-1 |

Hand protection:

Wear suitable gloves resistant to chemical penetration. Choosing the proper glove is a decision that depends not only on the type of material, but also on other quality features, which differ for each manufacturer. The protective gloves to be used must comply with the specifications of the regulation 2016/425 and the resultant standard ISO 374-1
